Text Safety Margin:

We recommend you keep important text inside the text safety margin, which is exactly 1/4" inch inside the cutting line. Doing so often produces the most pleasing printed results.

Actual Cutting Line:

This is the line where your print will be cut during the finishing process. The finished size after printing and cutting for this document is 36 x 48" inches.

Bleed Area Margin:

Background graphics and design elements intended to "bleed" to the edge of your finished size should meet the edge of this margin. The full size of this document including bleed area is 36.25 x 48.25" inches. Any artwork within the bleed area will be trimmed off leaving a clean and borderless printed image.
